## QUEST BRINGS MOBILE PAYMENTS TO THE MERCHANT'S WRIST

Australian Payments Provider Announces Industry First for Smart Watches

Melbourne, VIC, November 6, 2014– Quest Payment Systems Pty Ltd, an Australian payments provider specializing in full-service payment solutions, announced support for Android Wear smart watches for the Quest MT330 mobile payment solution.

# MT330

Quest MT330 was launched in early 2014 as a compact, mobile EFTPOS (mPOS) companion for Smartphones and Tablets enabling businesses to process Chip & PIN and Contactless transactions anywhere, anytime. Following this successful launch, Android Wear allows users leave their smart phone in their pocket and initiate payments through a smart watch.

*Quest has a history of innovation, and of bringing industry firsts to the Australian market. Earlier this year we were proud to continue this tradition in the mobile payment space with the launch of the Quest MT330, and we're now taking this further by supporting Android Wear. Wearable technology is set to revolutionise the way we interact with technology in our daily lives, and Quest will continue to shape how wearables can transform the card payment experience. – Andrew Graham, CEO*

Merchants can now start a sale using voice or touch controls directly from their Android Wear smart watch, freeing up their hands and allowing for a fast and seamless experience for both the merchant and customer.

Android Wear functionality is available now to existing and new (sign up required) merchants through the MT330 app on the Google Play store.

**About Quest Payment Systems Pty Ltd :** Quest - An all Australian technology company headquartered in Melbourne providing diverse and innovative end-to-end payment solutions to retailers and financial institutions both locally and abroad.

As the country's largest and leading full-service payment solution supplier, delivering Australia's only locally designed and manufactured range of payment terminal hardware, Quest excels in delivering both mass market and bespoke solutions drawing on over twenty years of development expertise.
