Quest Payment Systems uses Abrantix EFT/POS Terminal Testing Robots to automate the certification testing of their payment terminals.

MELBOURNE – 30 April 2019

The payment industry is evolving at an increasing pace. Payment terminals are continuously enhanced with new features and payment means. This results in more complexity for payment applications and systems. At the same time, meeting the latest rules and regulations is paramount to provide secure and high-quality solutions. For these reasons, quality assurance is an area of increasing importance in payment terminal development. High testing speed is required to meet the needs of clients, while new features and regulations require more and more testing.

Therefore Quest, a leading Australian payment terminal vendor, has decided to automate the testing of their payment terminals.

To achieve automation, Quest is using Abrantix EFT/POS Terminal Testing Robots. The Abrantix robots can press buttons on the terminal key pads or touch screens and can insert and eject payment cards. Through their API, the robots can easily be integrated with Quest's existing test solution.

"Quality assurance is an important aspect for Quest. We have an excellent reputation for quality and service with our clients. Adding test automation was the next logical step for us and we are happy to have found Abrantix and their robots", says Steven Ooi, COO of Quest.

"We are very excited to be able to help such an iconic Australian payments company. Quest already has an elaborate test setup and we are happy that our robots can be integrated neatly with this system", says Martin Gloor, Country Manger Australia of Abrantix

ABOUT QUEST PAYMENT SYSTEMS PTY LTD

With headquarters in Melbourne, Quest is an Australian owned technology company providing a diverse and innovative range of end-to-end payment solutions to businesses and financial institutions, both locally and abroad. As the country's leading full-service payment solution supplier, delivering Australia's only locally designed and manufactured range of payment terminal hardware, Quest delivers both mass market and custom solutions drawing on over twenty-five years of development expertise.

Quest's portfolio of solutions includes fixed line and mobile payment terminal hardware, software, gift card and online payment solutions, EMV smartcard, contactless, communications and transaction routing solutions as well as bespoke hardware and software design, professional consulting and manufacturing services.
